JOHNS and CO.'S
PATENT PERMANENT STUCCO WASH, WITHOUT SIZE OR OTHER COMBUSTIBLE INGREDIENT.

JOHNS and CO. having effected some important improvement in the manufacture of this very useful material, confidently offer it to the notice of the Trade and the Public generally, as possessing many advantages over the common Lime Wash or Water Colour for STUCCO or BRICK WORK. It is a Stone Colour, but may be tinted to any other.—DOES NOT WASH OFF.—In perfectly dry by twenty hours, and, being a non-absorbent, is admirably adapted for Railway Stations, Union Workhouses, Barracks, Schools, Prisons, &c. One cwt. will cover 200 square yards. It will keep good for years, and MAY BE EXPORTED WITH PERFECT SAFETY.

JOHNS and CO.'S STUCCO CEMENT.—This cement, from the great reduction in price, and its establishment for internal as well as external exhibition, places it above all other materials of its kind; it has no cementitious qualities; may be painted or papered in a few days; never blisters, cracks, or repulses; soon becomes as hard as stone; and may be cleaned with a brush and water.

The merits of the PAINT are well known for its application to stucco work of all kinds, and external work generally. Numerous testimonials to its goodness, and every information may be obtained, on application to the Sole Agent, PHILIP HARE, at the Warehouse, 28, Steel-yard, Upper Thames-street. A liberal allowance to wholesale dealers.

ROMAN and other CEMENTS.—Manufactured by J. M. BLASHFIELD, successor to the patentees, PARKER and WYATT, who, in 1796, fired their first kiln of PARKER'S ROMAN CEMENT, which has now for upwards of fifty years been extensively used in most of the public and private buildings and other works in this country and throughout the world. Among the more recent works in this country where it has been largely employed down the present year, for internal work, may be named the Lyceum and St. James's Theatres, the Carlton, Reform, and Army and Navy Club Houses, the London Docks, the Thames Tunnel, the Winter Palace, St. Petersburgh, the British Museum, the York Minster, the Royal Exchange, the Nelson Column, and the New Houses of Parliament. When properly applied, it is the most perfect and economical Cement for hydraulic works known; and, when used as a stucco, it will resist the action of heat and frost, and preserve walls from damp. It is a material for internal work, in preference to any other material, and is NEARLY AS CHEAP FOR SUCH WORK AS MORTAR MADE OF ORDINARY LIME. Terms, as Hydraulic Lime, for setting masonry where slow indurations is important, so as to allow for the settlement of work. A Cement of extraordinary tenacity and hydraulic properties, and with which the most ancient works in Lancashire have been executed. Hamelin's Patent Mastic, or Oil Cement, which may be painted immediately after use. Also Martin's Cement, Keene's Cement, Portland Cement, Cornelius Plaster of Paris, prepared of from the purest gypsum, and of any degree of fineness required. Chimney pots, Trusses, Pan Tiles, &c.—Manufactory, Mill-wall, Poplar. Depôts, Commercial-road, Lambeth, and Paddington-basin. Counting-house, 3, New London-street, Mark-lane, City.

ARCHITECTS or BUILDERS requiring ENRICHMENTS in COMPOSITION; CEMENT, or PLASTER, cannot have better executed work than that produced by WM. SMART, jun., of 18, CROWN-STREET, FINSBURY, who will be happy to give Estimates for work of any magnitude, at a reduced scale of charges. Architects' designs modelled with precision, and generally truthfully carried out. Established in the family three-fourths of a century.

They are proof against atmospheric action, gases, and salt water, of which the following testimonials are sufficient evidence:—

"9, Hillier-square,
14, April, 1851.

"GENTLEMEN,

"The result of the trial of your Mineral Oxide Paints on the Ferry Steamer entrusted by us for the service of the Honourable Commissioners of the Trinity House, has been quite satisfactory, both as it respects the quality and the durability of the Paints, and the economy of cost.

"You are at liberty to make use of this testimonial in their favour.

"We are, Gentlemen, your obedient servants,
Signed "BROWN, LENNOX, and CO."

"4, Wharf Canal-road, Kingsland road,
London, April 26, 1851.

"SIR,

"We have used your paint on the various gas works which we have constructed during the last seven years, and have no hesitation in stating it to be the best and most durable covering for iron.

"We shall continue to use and recommend it as heretofore.

"We are, Sir, yours obediently,
(Signed) "WESTWOOD and WRIGHTS."

Other testimonials can be had on application.

HUBBUCK'S PATENT WHITE ZINC PAINT—ANNOUNCEMENT.

For MARINE USES, it possesses the following advantages:—It is whiter than any other Paint, and retains this whiteness for years, unaffected by bilge-water, or noxious vapours from cargo. The White Paint in the hold of a ship, after discharging a sugar cargo, is found to be as white as the year before, when newly painted. Under these and other circumstances, when every other paint hitherto known and tried has failed, the "White Zinc Paint" has preserved the purities of its colour. Moreover, by virtue of its galvanic action on iron, it enters the pores, and forms an amalgam of the two metals, which protects the iron from rust, decay, or incrustation.

For the GENERAL PURPOSES of the decorative painter, the "White Zinc Paint" has been found unparalleled in its whiteness, clearness of colour, durability, and beauty of texture. It becomes so hard as to admit of polishing equal to the finest coach panelling.

For SANITARY PURPOSES the "White Zinc Paint" is valuable, not only from its being totally free from every ingredient injurious to health, but from its disinfecting chemical qualities which render it a powerful corrective where contagious diseases have prevailed; furniture or buildings painted with it are at once disinfected. Paralysis and Painters' Colic are avoided by its use, as well as similar results to the several parts of newly painted rooms. Apartments may be immediately occupied, without injury to the health of children or the most delicate constitution. In fresco, cheaper than common paint, from its spreading over a much larger surface. 1 cwt. of this paint covers as much as is usually painted by 3 cwt. of white lead. Each cask is stamped with the name "Hubbuck—London.—Patent," as the style of the Manufacturers. A circular with full particulars may be had of the manufacturers, THOMAS HUBBUCK and SON, Colour Works, opposite the London Docks.

PATENT WHITE ZINC, ANTIMONIAL, and other metallic PAINTS, greatly improved in the manufacture, may now be had in any quantity; also whitelead and painters' materials of every description.

Wholesale buyers and the trade supplied on liberal terms.

VAUGHAN and SIMONDS, Southwark Steam Colour Works, Stones-end, Borough, London.

PURE PATENT WHITE ZINC PAINT, manufactured from the Vieille Montagne Company's White (trade of) Zinc, JOHN WARNER and SONS are prepared to supply this paint to builders, painters, and plumbers, on wholesale terms. It is free from all poisonous qualities; it is unaffected by sea-water, sulphuretted hydrogen, or any of the gases; and preserves its original colour where white-lead paint will fail.—Prospectus on application. Head at J. WARNER and SONS', 8, Cross-st., Jewin-street, London.

PURE PATENT WHITE ZINC PAINT of the VIEILLE MONTAGNE ZINC MINING COMPANY.—The Company having become the proprietors of all rights and patents of the late Patent White Zinc Company in France and Belgium, is prepared to FURNISH, on a large scale, the WHITE OXIDE of ZINC in a PURE STATE, and of a quality which can only be manufactured from the Zinc ores from their Mines in Belgium. The Patent White Zinc Paint is superior in every respect to white lead paint. It is entirely free from all poisonous influences, and is unaffected by sea-water, sulphuretted hydrogen, or any gases; besides, it preserves its original colour, which white lead paint does not. White nine parts, chrome none of their paints invariably registered by white lead upon the human frame; neither Painters' Colic, nor Paralysis, &c. &c., to which dangerous complaints the workmen who manufacture and use it are subject, and to which persons who inhabit newly painted apartments are also liable. A spurious article having been introduced in the market under the name of White Zinc Paint, the Public is cautioned against it, because, when adulterated, it becomes a very inferior paint, instead of a first rate one.—For further particulars and Prospectuses, apply to Mr. H. F. SCHMOLL, general agent for Europe, and Head Seal, at the Company's Offices, 12, Manchester buildings, Westminster bridge, London.
